

Course Information for the Class of 2013

ATTENTION: It is important that you THOROUGHLY read all of the information below and choose FIVE courses that are most interesting to you. You will need to use this information when completing the First Year Information form by June 1st.

Please note that 27 of the courses below are part of a Living and Learning Community. Sewanee is proud to offer new students an opportunity to enhance their academic experience by living in residence halls with students who share their interests. These themed-based residence groups are called Living and Learning Communities, and in them, students will have opportunities that complement the classroom experience. Participation will connect students and faculty advisors in areas of intellectual interest. Students in learning communities can engage in community projects, field trips, leadership training, guest lectures and dinners. Participation is voluntary and will not limit your experience or prevent participation in other organizations and activities. Instead, it will initiate connections and opportunities aligned with interests you already have. Learning communities will be housed in several of the residence halls on campus.

The Living and Learning Communities and accompanying courses for 2009-2010 are listed below:

The Film Experience

This community exposes students to various aspects of the cinema: film production, Shakespeare and film, theater and film, and Chinese film. In addition to working closely with the Sewanee Cinema Guild, students in this community might have opportunities to attend film festivals, meet professional film makers, and possibly even create a small film of their own.

Humanities

This community is for students interested in taking part in the four-semester Humanities program in the College. Created especially for students who are interested in an integrated approach to the study of literature, drama, history, art, philosophy, and religion, this community will provide additional opportunities to explore these fields outside of the classroom. Opportunities to visit museums in Nashville or Atlanta, as well as to attend professional theatre productions may be available.

Exploring the Sewanee Landscape

This community engages Sewanee's natural setting as a setting for learning and explores a variety of ways in which human beings can approach and appreciate the natural world. Opportunities will exist for students to get out into the Domain, and discover how this natural treasure can be used to further their educations and their personal development. There will also be opportunities to get involved in environmental activism, and to work to further protect our natural resources.

How Sweet the Sound: Music, Religion, and Southern Culture

This community encounters music as it intersects with culture, religion, and Southern history and encourages students to become active in the vibrant musical culture of the campus and the surrounding region. Students will have opportunities to make and perform music, as well as to hear some of the exciting music being made around the Mountain. This community will also explore the newly acquired lands of Lost Cove for signs of the people who once lived here, and explore how music and religion formed a part of their lives.
